

Midterm Task 5

Creating Class and Instantiating Objects in Python

PROBLEM

a. Create User Class with the ff: attributes (Use Constructor for this)

- first_name
- last_name
- followers_count
- friends_name [LIST]

Note: You can make a List an attribute of a class

b. Create the ff: methods

- introduce_self – which should output “ Hi I am {first_name} {last_name}
- view_full_profile – which outputs all the information of the user as shown below

Profile Name is Bradd Pitt with 10 followers
Friend are... Juan Pedro Jose

c. Create a separate TestUser class to test if the program is working as expected, allowing for user input to be passed as parameters of the object. Create atleast 2 object instance to test the class template

Sample Output 1:

Insert a Record?[y|n]:y

First Name: Bradd
Last Name: Pitt
Followers:10
Friends:
Juan
Pedro
Jose

Insert a Record?[y|n]:y

First Name: Tom
Last Name: Cruise
Followers:100
Friends:
Juan
Pedro
Jose

Insert a Record?[y|n]:n

Here are the Records....

Hi I am Bradd Pitt
Profile Name is: Bradd Pitt with 10 followers
Your friends are: Juan Pedro Jose

Hi I am Tom Cruise
Profile Name is: Tom Cruise with 100 followers
Your friends are: Juan Pedro Jose

SOURCE CODE

main.py

```
1 class User:
2     def __init__(self, first_name, last_name, followers_count, friends_name):
3         self.first_name = first_name
4         self.last_name = last_name
5         self.followers_count = followers_count
6         self.friends_name = friends_name
7
8     def introduce_self(self):
9         print(f"Hi I am {self.first_name} {self.last_name}")
10
11    def view_full_profile(self):
12        print(f"Profile Name is: {self.first_name} {self.last_name} with {self.followers_count} followers")
13        print("Your friends are:", ", ".join(self.friends_name))
14
15
16 class TestUser:
17     def __init__(self):
18         self.records = []
19
20     def run(self):
21         while True:
22             choice = input("Insert a Record?[y|n]: ").lower()
23             if choice != 'y':
24                 break
25
26             first_name = input("First Name: ")
27             last_name = input("Last Name: ")
28
29             while True:
30                 try:
31                     followers = int(input("Followers: "))
32                     break
33                 except ValueError:
34                     print("Please enter a valid integer for followers.")
35
36             print("Friends (enter blank line to finish):")
37             friends = []
38             while True:
39                 friend = input()
40                 if friend.strip() == "":
41                     break
42                 friends.append(friend)
43
44             user = User(first_name, last_name, followers, friends)
45             self.records.append(user)
46
47             print("\nHere are the Records...\n")
48             for user in self.records:
49                 user.introduce_self()
50                 user.view_full_profile()
51                 print()
52
53             print(f"There are currently {len(self.records)} Members in the Social Media page")
54
55
56 test = TestUser()
57 test.run()
58
```

input

OUTPUT

```
Insert a Record?[y|n]: y
First Name: Monica
Last Name: Garcia
Followers: 100
Friends (enter blank line to finish):
Joana Miclat
Hannizel Dumangas

Insert a Record?[y|n]: y
First Name: Isabel
Last Name: Conklin
Followers: 1500
Friends (enter blank line to finish):
Jeremiah Fisher
Conrad Fisher

Insert a Record?[y|n]: n

Here are the Records....

Hi I am Monica Garcia
Profile Name is: Monica Garcia with 100 followers
Your friends are: Joana Miclat, Hannizel Dumangas

Hi I am Isabel Conklin
Profile Name is: Isabel Conklin with 1500 followers
Your friends are: Jeremiah Fisher, Conrad Fisher
