

MIDTERM LAB TASK 1

**Problem 1. Use Appropriate Escape Sequence(\n, \t \b \ ..etc)
for the problem below**

Item Description

Create a program that prints the following text:

```
Database Record
////////////////////
Name:      John Doe
Email:     john.doe@example.com
University: ABC University
```

Sample Output 1

```
Database Record
////////////////////
Name:      John Doe
Email:     john.doe@example.com
University: ABC University
```

SOURCE CODE

```
full_name = "Joana Miclat"
email = "joanamiclat2@gmail.com"
university = "City College of Angeles"

#Format Specifiers
print("Full_name:" ,(full_name))
print("Email:", (email))
print("University:", (university))
```

SAMPLE OUTPUT

```
Full_name: Joana Miclat
Email: joanamiclat2@gmail.com
University: City College of Angeles
```

```
...Program finished with exit code 0
Press ENTER to exit console.
```

Problem 2. Using Placeholders for Email Details: Use appropriate type specifiers %s, %d, %f etc... for this task

Item Description

Write a program that prints the output below:

```
Dear John, I hope this email finds you well.
I wanted to reach out and say hello.
I hope you are doing well and enjoying your day.
It's been a while since we last spoke, and I wanted to catch up with you.
Let's plan to meet up soon and have a great time together!
Subject: Greetings
Sender: Jane
Version: 1.2
Discount: 10.50%
Status: A
Code: ABCD123
Location: City XYZ
Age: 30
Company: ABC Corporation
Website: www.example.com
Phone: +1 123-456-7890
Job Title: Software Engineer
Department: Engineering
```

The program should use placeholders to present the information accurately.

SOURCE CODE

```
1 # Python VArIables
2
3 subject = "Greetings"
4 sender = "Jane"
5 version = 1.0
6 discount = 10.50
7 status = 'S'
8 code = "ABCD123"
9 location = "City College"
10 age = 20
11 company = "BPO"
12 phone = +9074899200
13 job_department = "Web Developer"
14 department = "Developer"
15
16 #Escape Sequence
17 print("Dear Joana, I hope this email find well.")
18 print("I wanted to reach out and say hello.")
19 print("I hope you are doing well and enjoying your day.")
20 print("It's been a while sice we last spoke, and i wanted to catch up with you.")
21 print("Let's plan to meet up soon and have a greet time together!\n")
22
23 print("subject: ", (subject))
24 print("Sender: ", (sender))
25 print("Version: ", (version))
26 print("Discount: ", (discount))
27 print("status: ", (status))
28 print("code: ", (code))
29 print("location: ", (location))
30 print("age: ", (age))
31 print("company: ", (company))
32 print("phone: ", (phone))
33 print("job_department: ", (job_department))
34 print("department: ", (department))
35
```

SAMPLE OUTPUT

```
Dear Joana, I hope this email find well.
I wanted to reach out and say hello.
I hope you are doing well and enjoying your day.
It's been a while sice we last spoke, and i wanted to catch up with you.
Let's plan to meet up soon and have a greet time together!

subject:  Greetings
Sender:   Jane
Version:  1.0
Discount: 10.5
status:   S
code:     ABCD123
location: City College
age:      20
company:  BPO
phone:    9074899200
job_department: Web Developer
department: Developer

...Program finished with exit code 0
Press ENTER to exit console.
```

Problem 3. Book Reservation; Accept User Input

Write a program that asks the user to enter the title of a book (string), the author (string), the year of publication (int), the genre (string), the library (string), the member ID (string) and the return date (string). Print the entered values directly. The output should look like:

```
You have successfully reserved the book [Title] by [Author].
Year of Publication: [Year]
Genre: [Genre]
Library: [Library]
Member ID: [MemberID]
Return Date: [ReturnDate]
```

SOURCE CODE

```
1 title = input ("Enter the book title:")
2 author= input ("Enter the author:")
3 publication = input("Enter the year of the publication:")
4 genre = input ("Enter the genre:")
5 library = input ("Enter the library:")
6 member_id = input ("Enter your member ID:")
7 return_date = input ("Enter the return date:")
8
9 print("You have succefully reserved the %s by %s" %(title,author,))
10 print("Year of Publication: %s" %(publication))
11 print("Genre: %s" %(genre))
12 print("Library: %s" %(library))
13 print("Member Id: %s" %(member_id))
14 print("Return Date:%s" %(return_date))
15
```

SAMPLE OUTPUT

```
Enter the book title:1984
Enter the author:Orwell
Enter the year of the publication:1949
Enter the genre:Dystopian
Enter the library:Central
Enter your member ID:12345
Enter the return date:2023-0710
You have succefully reserved the 1984 by Orwell
Year of Publication: 1949
Genre: Dystopian
Library: Central
Member Id: 12345
Return Date:2023-0710

...Program finished with exit code 0
Press ENTER to exit console.
```

Problem 4. Day Identifier

Item Description

Write a program that takes an integer (1-7) as input and prints the corresponding day of the week based on the following conditions:

- If the input is 1, print "Monday"
- If the input is 2, print "Tuesday"
- If the input is 3, print "Wednesday"
- If the input is 4, print "Thursday"
- If the input is 5, print "Friday"
- If the input is 6, print "Saturday"
- If the input is 7, print "Sunday"
- If the input is any other value, print "Invalid input"

Sample Output 1

```
Enter day: 1
Monday
```

Sample Output 2

```
Enter day: 4
Thursday
```

Sample Output 3

```
Enter day: 5
Friday
```

SOURCE CODE

```
main.py
1 day = int(input("Enter Day: "))
2
3 if day == 1:
4     print("Monday")
5 elif day == 2:
6     print("Tuesday")
7 elif day == 3:
8     print("Wednesday")
9 elif day == 4:
10    print("Thursday")
11 elif day == 5:
12    print("Friday")
13 elif day == 6:
14    print("Saturday")
15 elif day == 7:
16    print("Sunday")
17 else:
18    print("invalid input")
19
```

SAMPLE OUTPUT

```
Enter Day: 4
Thursday

...Program finished with exit code 0
Press ENTER to exit console.
```
